## Computer Tricks & Tips

Alt + Tab

It's a known fact that many of us have tons of programs open on our computers at once. There must be a quicker and easier way to switch between all of these programs, right? Yes! All you have to do is press your **Alt** and **Tab** keys (hold down the **Alt** key and then press **Tab**) and a small window showing all of your open programs will pop up. Just continue to press the **Tab** key to scroll your way across the programs, highlight the one you want, and then release the **Alt** key to bring up the one you choose. Want to change programs again? Just repeat the process.

Cool, huh?
