HOUSE CALLS

Members of the GSU faculty/staff will be going door-to-door making "House Calls" welcoming freshmen students to campus and answering questions.

Students who are in their rooms will receive free giveaways and a chance to win one of 3 iPods!

Hope to see you then!

**Tuesday, August 21
6:30 - 8:00 pm**

ROOM CHANGES

To change rooms, please go by your hall office on Wednesday, **August 22nd from 7pm - 10pm** and speak with your Building Director. To change halls, go by the hall office of the residence hall you wish to live in and speak to the Building Director on Thursday, **August 23rd from 7pm-10pm.**

The Blue Screen of Death

From Wikipedia, the free encyclopedia: www.wikipedia.com

The **Blue Screen of Death** (BSOD, bluescreen, or stop error) is an error displayed by certain operating systems, most notably Microsoft Windows, after encountering a critical system error. Bluescreens can be caused by poorly written device drivers, faulty memory, a corrupt Registry, or incompatible DLLs (dynamic-link library). Bluescreens have been present in all Windows-based operating systems since Windows 3.1; OS/2 and MS-DOS suffered the Black Screen of Death, and early builds of Windows Vista displayed the Red Screen of Death after a boot loader error. If you get a blue screen and you don't know much about computers, the best thing to do is to seek out a computer tech. to help you fix your computer problem!

Career Fact: Did you know that 75-80% of jobs are found through networking? The key is to start early and utilize all networks, including Career Services! Come by the office or call 681-5197 for more information on how to network successfully!

PEST CONTROL

The initial step to the elimination of insects in your residence hall is sanitation. All insects need food, moisture, and harborage in order to survive. The pest control operator's success at an individual's residence will be determined by the resident's housekeeping.

The two most troublesome insects found in residence halls and apartments are ants and roaches. Both of these can be completely eliminated, but not with pesticides alone. The outcome solely resides on the sanitation of the individual residence; below are some steps each of our students can practice in order to be insect free:

1. Wash dirty dishes immediately after eating. Do not leave dirty dishes on table, counter or place in the sink. After washing dishes, drain sink; do not leave water standing.
2. Vacuum on a regular basis. (Not just before your family visits.)
3. Do not leave chips, cookies, cereal, etc. that have interior bags left open. Either seal with an appropriate sized zip lock bag, or place in the refrigerator.
4. After consuming beverages, rinse containers and dispose of in an appropriate manner.
5. When cleaning room/apartment, do not place trash bag outside the door until leaving the premises. Place in dumpster immediately.

By following these five simple procedures you will be able to assist in your pest control success. If your issue is still not resolved after following the above recommendations submit a request to have a professional inspect and treat your apartment.
