Director's Corner

Season's Greetings Scholars,

Can you believe it? Fall semester is now in the record books. My hope is that you will take some time during winter break to reflect! Reflect on those things that have made you successful academically and otherwise. Then, reflect on those unsuccessful attempts and remember the definition of “insanity” as coined by Albert Einstein: “doing the same thing over and over again and expecting different results”. Start to regroup and develop, if you haven't already, your “spring semester plan”? As Ben Franklin once said: “If you fail to plan, you are planning to fail”. The TRiO staff is planning for a successful spring 2018 and we want to make sure you are along for the ride.

Our theme this year is Engage. Empower. Evolve. We have worked very hard to carry out our theme this fall. We started the fall with a GREAT kick off featuring the engaging author, consultant and nationally recognized speaker, Richard Taylor. In addition to our familiar way of providing services, we continued to engage you with “pop-up” seminars on stress. Ms. T'Keyah Sutton, our TRiO “resident artist”, along with the counseling center offered three stress management seminars around midterms and finals on how you can use art to relieve stress. Each participant walked away with a personal work of art to relieve stress. Each participant was encouraged by Jody to get moving! TRiO also opened an avenue of engagement with Small Group Discussions on stress. Participants in attendance were engaged in supporting underrepresented youth through many community organizations he belongs to and through the nonprofit organization, LEADERS, Inc., which he is the founder and CEO. In recognition for creating outstanding national models for the college preparation of underrepresented students, Dr. Bullock received the prestigious 2004 Washingtonian of the Year award by Washingtonian Magazine. Numerous articles including the HHMI Bulletin and NCAA Challenge Magazine have also featured his accomplishments.

One of his favorite sayings is, “Don’t wait for tomorrow to be successful, do one successful thing each day.”

O

Another opportunity for engagement is through the hiring of our now full-time Academic Success Coach, Dr. Thomas Bullock.

Affectionately known in TRiO as Dr. B, Dr. Bullock completed his undergraduate work at Xavier University in New Orleans, Louisiana and earned a bachelor’s degree in Mathematics. His graduate work has included engineering at Tulane University, and mathematics at Georgetown University and the University of the District of Columbia. Dr. Bullock earned his Education Doctorate in Higher Education Management and Leadership from the University of Pennsylvania.

As a mathematics professor, Dr. Bullock has taught undergraduate and graduate level courses at Georgetown University, Towson State University, Trinity University, and the University of the District of Columbia. At the University of the District of Columbia Dr. Bullock also served as chairperson of the Department of Mathematics.

In addition to his higher education work, Dr. Bullock remains passionately engaged in supporting underrepresented youth through many community organizations he belongs to and through the nonprofit organization, LEADERS, Inc., which he is the founder and CEO. In recognition for creating outstanding national models for the college preparation of underrepresented students, Dr. Bullock received the prestigious 2004 Washingtonian of the Year award by Washingtonian Magazine. Numerous articles including the HHMI Bulletin and NCAA Challenge Magazine have also featured his accomplishments.

One of his favorite sayings is, “Don’t wait for tomorrow to be successful, do one successful thing each day.”

On stage or on the page, Richard’s remarkable display of transparency enables him to connect with audiences beyond the surface of the subject matter and continues to be the hallmark of his career. His inspiring message of hope and perseverance delivered with undeniable authenticity has helped to establish him as one of the most influential voices of this generation. A dynamic speaker, thought-provoking author, and passionate mentor, whichever platform he uses, Richard continuously proves himself to be an agent for change and an advocate for life.

Scholars received an “autographed” copy of his book, “Love Between My Scars”.

Richard Taylor
Fall 2017 Kickoff Speaker

Richard encouraged Scholars to “walk in purpose”!
TRiO Health Majors’ Outing

Four TRiO Health majors traveled to the quarterly meeting of the Chatham County Board of Health. There students got a first-hand experience of how health policies are created. They met with leading health administrators of the county. Pictured from left to right are Pascal Harley, Wessleigh Holloway, Ella Williamson of the African American Health and Resources Center, Ebony Williams and Nehemiah Kiruy.

TRiO Scholars attend 17th Annual Student Initiative Leadership Conference at Savannah State University

Armstrong TRiO was in the house with more than 200 other college and public school students on November 12 at the 17th Annual Student Initiative Leadership Conference at Savannah State University. Opening the conference was nationally recognized motivational speaker Keith L. Brown, aka, Mr. I'mPossible. Brown motivated the attendees to have a vision, be innovative and always persevere through hardships and barriers to success. Four scholars, Adalis Ball, Shanelle Dillion, Nia Skelton and Chakym Cummings (pictured top left), represented Armstrong in the debate competition. Debate team winners were Chakym and Shanelle (pictured top right). Timmy Askew (pictured bottom left) entered and won the essay competition. Other Scholars in attendance were Ebony Williams, T'Keyah Sutton, Kasey-Lee Neal, Kendrick Johnson-Burney and Monique Pilcher (not pictured).

TRiO Scholars Morgan Baker and Jameisha Porter received their white coats. A White Coat Ceremony is a formal welcome into the nursing profession. The ceremony signifies the transition from classroom learning to clinical learning. Congratulations Scholars!!

Art Relieves Stress Regardless of Skill!

Studies say that making art reduces stress even if you kind of “suck” at it. Amanda Kort from the University Counseling Center gave students this reassurance. Afterwards, TRiO Scholar T'Keyah Sutton, Art Education major, guided Scholars in the development of their very own “masterpieces”. Good job Scholars!
